- Suitable for fitting on a 12mm hearth

**2022 EU Ecodesign approved stove**

**Designed for high efficiency, low particulate emissions**

**Wood burning only**

**Optional direct air connection to an external air supply for use with modern, airtight homes**

### Important Safety & Technical Information

Stove Buddy recommends that an approved competent installer of solid fuel appliances should undertake a site survey prior to purchase. It is a requirement that any of our stoves should be installed by an appropriately qualified installer.

To comply with Document J of the Building Regulations you may need to install a fixed air vent to ensure adequate ventilation. Your Stove Buddy retailer or approved competent person of solid fuel installations will be able to advise on this.

Please note that all parts of these stoves, particularly the glass panel in the door, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with the current version of BS 8423 is used in the presence of young children, the elderly or infirm.

You can find more information regarding our products and download user guides from [stovebuddy.co.uk](http://stovebuddy.co.uk).

Stove Buddy is a brand owned by:  
MMF Bristol Ltd. Flue House, Portview Road, Avonmouth BS11 9LQ

Stove images are not intended to show real installations and are for visual representation only.

Stove Buddy pursue a policy of regular product improvement. Products supplied may therefore differ in specification from those illustrated, or described in this brochure; you should always confirm the final specification of the stove with your Retailer, or approved installer before purchase.

### Brochure Photography

All of the flame pictures shown are taken from real fires. Please note however, that flame pictures will vary depending on the exact fuel used, flue conditions and surrounding geographical features. Given that building regulations are subject to change, some of the photography may not comply with the requirements of the latest Building Regulations. You should always check your proposed installation arrangement with your approved competent person of solid fuel installations before proceeding and observe the minimum distance to combustible materials as stated in the installation instructions
